

BACKTRACK, CHALLENGING THE LAWS OF DIGITAL PRINTING

FEATURES

- The first digital printer, which allows printing from the bottom up, offering a new dimension.
- Print in high resolution; QR codes, DATAMATRIX, Bar codes, Logos, Images, Custom labels...
- Advanced software system that allows to make intelligent productions, prints with dynamic designs where each print is different from the previous one.
- New printing area, allows to decorate and labeling an inaccessible surface until now.
- Any type of ink; Water base, Oil base, Solvent base, UV, Soluble salts...
- Total control over the ink, with recirculation system.
- Easy and fast production change.
- Allows printing on all types of surfaces; ceramics, wood, textiles, glass, cardboard, plastic...
- Reduced dimensions, allows you to integrate it in any area of your production.
- Essential tool for Industry 4.0.
- Available up to 8 printheads.

Print detail made with BACKTRACK, on the back of a tile

sep 2019
