

ALL TYPES OF INK, ONE MACHINE

MAIN FEATURES

- Three totally independent circuits.
- Compatible with most industrial INKJET printheads.
- Compatible for all types of inks at the same time;
Solvent based inks, Oil based inks, Water based inks and UV inks.
- The user decides at each moment, if he discards the used cleaner or if he wants to recycle it.
- Preconfigured recipes for each circuit.
- User-defined recipes for each circuit.
- Independent alarm for each circuit, when the reject tank is full.
- Includes "blow" option to empty all the remaining liquid inside the printhead.
- Designed to work 24x7.
- Very low maintenance.
- Internal lighting adaptive to the state of the machine.

THE EASIEST AND QUICKEST WAY TO PURGE PRINTHEADS

TECHNICAL SPECIFICATIONS

Model	Voltage	Power	Weight	Hight	Width	Lenght	Working range temperature	Maximum Printheads	Compressed air
PURGESTATION	230V AC 50-60 Hertz	1.1 Kilowatt 6A	175 Kilograms 386 lb.	1,660 milimeters 65.35"	862 milimeters 37.87"	1,028 milimeters 40.5"	Up to 60 degrees centigrade 140F	3	50 liters minute 2 bar pressure 200 kPa

Our constant R&D on the INKJET market, gradually incorporates new features on this machine.

Now, you can also use PURGESTATION to refill printheads before installing them in the printer, removing any air bubbles that might be inside.

Get in the habit of plugging a printhead into the printer and start printing without further delay.
