

## SMART CLEANJECTOR

### ANALYSIS AND CLEANING OF INDUSTRIAL INKJET HEADS, FULLY AUTOMATIC

#### MAIN FEATURES

- Our AI allows us to analyze and recognize the real status of each nozzle:
  - **Damaged** (non-recoverable)
  - **Blocked or diverted** (potentially recoverable)
  - **Perfect**
- Visualize graphically the real status of each nozzle.
- Fully automated and unattended process. SMART CLEANJECTOR will tell you when to remove the head.
- Dramatically reduces the amount of cleaner needed.
- Cleaning and analysis capacity of up to 4 heads simultaneously.
- The same machine, for all brands and models of heads on the market:  
SEIKO, EPSON, RICOH, DIMATIX, KONICA MINOLTA, KYOCERA, XAAR, TOSHIBA, DURST...
- Specific cleaning recipe for each brand and model of head.
